**LIYANG JIUHE MACHINERY INDUSTRIAL CO., LTD.**

## 01 / About Jiuhe

As a leading manufacturer in China, JIUHE MACHINERY has been specialized in producing pellet mill and related spare parts since 2003. Currently, JIUHE products have been sold to more than 30 different countries and areas all over the world.

Since foundation of JIUHE MACHINERY, our company has devoted ourselves to improving all steps from production equipment to customer service based on our years' experience, in order that JIUHE product can meet the growing request in the market.

In addition, JIUHE MACHINERY equips with an advanced photovoltaic power generation system, and relies on green energy to reduce pollutant emissions, to contribute ourselves to the goal of carbon neutrality.

◆ Due to our position as one of the largest companies in the pelleting industry, we have the absolute advantage regarding both production technology and capacity.

◆ We invest in upgrading our equipment every year, and we remain up-to-date on technology at all times

◆ One of our main characteristic is product diversification, and we are also continually developing new products to meet the needs of our customers.

## 03/ Certification

# Feed Machine Parts

## 05/ Advanced Equipment & Technology

▲ forged Parts

▲ Full-automatic CNC Lathe Machine

▲ Full-automatic CNC Deep-hole Gun Driller

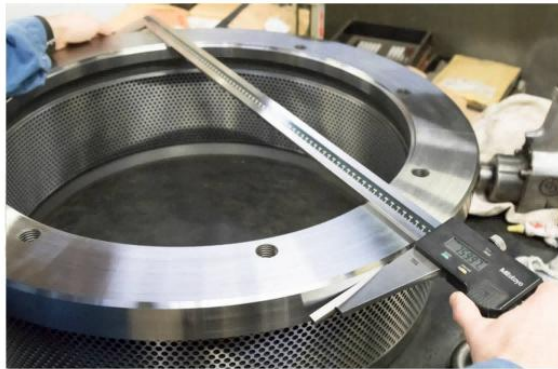

▲ Vacuum Oven & Quench Furnace

# Feed Machine Parts

## 06/ Strict Inspection & Testing

▲ Outer Diameter Measurement

▲ Metallurgical Microscope

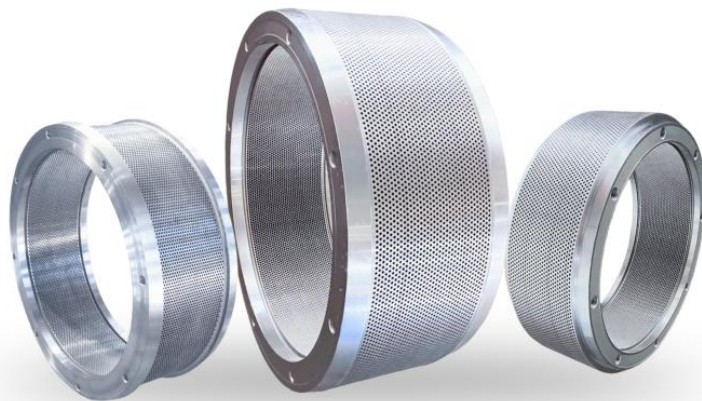

▲ Dimension Checking

▲ Hardness Test

## 07/ Pellet Die

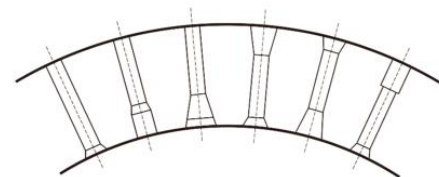

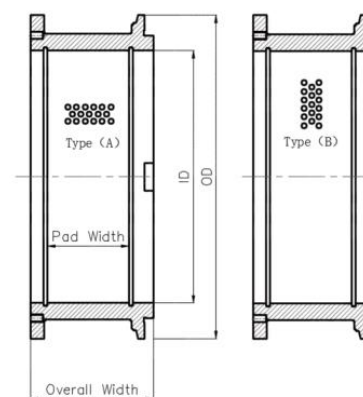

Pellet die is the very heart of pelleting process, giving the final product the required shape, structure and hardness.

With years of development, we can customize all shapes of pellet dies for all pellet mill brands worldwide, such as SZLH, MUZL, ANDRTIZ, CPM, BUHLER, VAN AARSEN, MUNCH, KAHL, etc, in diameters ranging from 200mm to 1500mm, and hole diameters from 1.0-30mm, using only the best raw material and the most advanced equipment.

## 08/Roller & Shell

The roller is the second vital part of pelleting chamber, used to press the material to be pelletized through the die holes.

Nowadays, pelleting applications is becoming more and more widely, be it in the traditional feed and biomass areas, to more unusual fields, such as recycling, chemical, cat litter, and paper industries.

We can customize the rollers to meet your specific demands, always in the quality and with the service that JIUHE stands for.

Surfaces available for the roller shell include as follows:

- Dimpled
  - Straight Corrugation
  - Oblique Corrugation
  - Curved Corrugation
  - Fishbone Corrugation
- and others
